

Have **you** ever thought about developing a new product to answer a problem that faces you at work in the Mater?

The Pillar Centre can help!

We would love to know if you are interested in being involved in innovation and what supports can be put in place to support you. Fill out the attached survey along with your email address and we'll get back to you in the coming weeks

<https://www.surveymonkey.com/r/FJXJV5Z>

We are developing a core group, across all staffing areas of the hospital, who are interested in developing innovative solutions to the practical problems they face on a daily basis. This might include anything from a new medical or surgical device, an electronic sensor, clothing, security hygiene, maintenance, food safety or nutrition, laboratory equipment, software or indeed anything that can potentially be developed into a new product.

The Pillar Centre can offer you the opportunity for training and mentoring in product development and advice as how to proceed on with further commercial development and funding
